SRM Public School: Shaping Innovators, Thinkers, and Global Citizens

In a rapidly evolving world, SRM Public School stands committed to nurturing learners who are confident, creative, and future-ready. With a strong foundation in academics and a progressive vision, the school places STEM education at the heart of its learning ecosystem, encouraging students to explore science, technology, engineering, and mathematics through hands-on innovation and research-driven learning.

This focus has led to remarkable global achievements. SRM Public School students completed an international satellite-building project and secured 2nd place in Russia and secured 3rd place at the Hydrogen Grand Prix in Australia, earning qualification for the World Finals in Switzerland in July 2026 a proud milestone in sustainable innovation.

Beyond STEM, the school celebrates creativity and student voice. Numerous young authors from SRM Public School have published their own books, while budding musicians compose original music and young filmmakers create films in the school's in-house studio. Students also lead podcasts, publish

SRM Chronicles, and actively participate in national platforms through patent filings, research paper presentations, and innovation showcases.

Through cross-border international exchange programmes and a strong emphasis on holistic development, SRM Public School continues to

empower students to discover their potential and make meaningful contributions locally and globally.
